Product Images

Short Description

An accurate HACCP compliant, handy pocket sized thermometer probe with protective sheath. This thermometer also conforms to EN 13485 for use in transportation and storage. Well suited to professional trades where exact measurements are all important. Fast and accurate this thermometer takes a new measurements every one second and records the minimum and maximum temperatures reached.

The case is rated to IP65 meaning it can be washed under the tap for easy and simple cleaning. Ideal in an environment where hygiene is so important

Ideal for testing temperatures during BBQ, grilling or roasting. Can be used in all food preparation such as in baking, sugar/candy making or in the catering industry. For the checking the supplies or the incoming goods, inspection in the canteen kitchen or during the processes in the food industry.

This thermometer also conforms to EN 13485 for the use in healthcare environments.

Whilst this equipment is designed for use within the food industry, the probe can be used to measure internal temperatures of just about any substance within the temperature range. So if you need to test the internal temperature of a liquid or semi solid object this will work for you.
