

# Twin Wireless Min/Max Thermometer

## Product Images

## Description

---

From TFA Dostmann, the Twin digital thermometer has some great features. The unit will record minimum and maximum temperature measurements reached, for both the indoor base station and the remote temperature sensor. The base station itself has a double screen, enabling you to simultaneously view current indoor & outdoor temperatures, as well as the minimum and maximum temperatures reached for both in and outdoors since the last reset.

The temperature sensor transmits across 30m open field, and is fully weatherproof - it can be left outside all year round, exposed to the elements.

The indoor temperature station also has a handy frost symbol. The unit is finished in a modern black design with complimentary silver writing.

### Temperature Range

- Indoor Range: from -10°C to 50°C
- Outdoor Range: from -20°C to 50°C
- Measure Units: °C and °F

### Minimum/Maximum

- Memory: 24 hour
- Reset: Auto

### Alarms

- Temperature Alarm
- Frost alert

### Transmission

- Distance: 30m Open Field
- Type: Wireless

### Dimensions

- Display: L 137 x D 17 x H 83mm

### Battery

- Type: AAA (Not included)
- Life: 12-18 months

### Supplied With

- 1 x Twin Plus Base Station
- 1 x 30-3193 Temperature and Humidity Sensor
